

Healing touch

This hospital follows homeopathy to treat patients

A FULL fledged homeopathy hospital. Surprised. Don't be. Apart from the daily OPD at Aditya Homeopathic hospital and healing centre at Pimpri, emergency patients are also cared for at this hospital. And for all his contribution in the field of homeopathy, the Global Economic Council, New Delhi presented the International Gold Star Millennium award to Dr Amarsinh Nikam at Bangkok.

Nikam who runs the Aditya Homeopathic Hospital and Healing Centre said that homeopathy can treat disorders like diabetes, blood pressure and others. "An in-depth analysis of the patient's physical and mental condition helps in prescribing the correct classical homeopathic medicine", says Nikam.

The 50-bed hospital has two ambulances and is also a training ground for graduate and post graduate students. Author of *Homeopathy- the art of rapid and gentle healing*, Nikam has also announced the institution of the Dr D V Nikam award for homeopathy. "Costs are spiralling with new medical techniques and drugs. Still there is no sure shot medicine in the allopathic system. Here homeopathy can help treat disorders", Nikam said adding that the award would help achieve the objective. The award distribution ceremony will be held on March 11 on the death anniversary of Dr D V Nikam.
