

Veterinary Homoeopathic Camp

This is a unique attempt and effort by Dr. Amarsinha Nikam to use Homoeopathic medicines for animals (Cattles).

This was the camp organized by **Urja Foundation** in Association with **Mission Homoeopathy** on 23rd Sept. 2012 at Yashodeep Mangal Karyalaya, A/P Awasari Bk, Gawadewadi, Tq. Ambegaon, Dist. Pune, Maharashtra, India.

There was an overwhelming response from farmers who got their cattles from various parts of the district. The cases dealt with were those which were denied of any improvement by Veterinary doctors.

Around 190 cattle were examined and treated during the camp. It was assisted by various veterinary doctors to help out and explain various aspects of animal diseases to Homoeopathic doctors.

The case was taken as per the Classical Homoeopathic law. The interesting part of the camp was the curiosity about how to take an animal case in Homoeopathic way and how to perceive the body language of the diseased animal and finally come to single remedy conclusion.

The result which came after 15 days were magnificent. Cattles had a 90% of recovery with single 30 potency dose of Homoeopathic medicine. It was amazing to see the effect of single dose of 30 potency, which gave miraculous result but with 100% Scientific method.

Hope to continue with such kind of camps...

Doctors participated :

Dr. B.S.Ghangale [Veterinary Medical Officer, Vadgaon], Dr. S. Hinge [Veterinary Doctor], Dr. Datta Kamble [M.V.Sc.] from Urja Foundation along with the Team of Senior Homoeopaths from Mission Homoeopathy – Dr. Sai Chinta, Dr. Nilesh Jangle, Dr. Balkrishna Gaikwad, Dr. Shrikant Langde, Dr. Rakhi C.
